

Mr. Farmer, Compare these Figures---Figures Don't Lie!

These Figures Compiled by Agricultural Board

Cost of Mules, Harness, Equipment—

| | |
|------------------------------|----------------|
| 6 mules at \$300.00 each | -----\$1800.00 |
| 6 sets of harness at \$25.00 | ----- 150.00 |
| 2 plows at \$70.00 each | ----- 140.00 |
| 1 tandem disc at \$150.00 | ----- 150.00 |

\$2240.00

Cost of FORDSON tractor and Equipment—

| | |
|----------------------------------|----------------|
| 1 tractor delivered on your farm | -----\$ 840.00 |
| 1 plow (2 disc) | -----\$ 250.00 |
| 1 tandem disc | -----\$ 165.00 |

\$1255.00

The FORDSON Saves You on Initial Cost \$985.00

Other things to be considered along this line is the difference in the kind of work the tractor does. There's no doubt that the work the tractor does is far superior to the work of the mule plow. After the farmer has his work all done with the tractor he can store the tractor away in the shed until the next spring and it won't cost him a cent, while a mule is eating 365 days in the year. There is other things the FORDSON can be used for too, you can drag roads, grade the road, bale hay and do all kinds of belt work or you can even do hauling with this tractor if you want to.

Cost of Operating with Mules— (plowing 104 acres)

| | |
|--|---------------|
| Feed for 6 mules per month | ---\$100.00 |
| Labor cost, 2 men at \$3.00; or 26 days | -----\$156.00 |

Total-----\$256.00

Cost of operating FORDSON tractor— (plowing 208 acres, twice as much)

| | |
|------------------------------|-------------|
| 520 gallons gasoline at 25c | ---\$130.00 |
| 25 gals. cylinder oil at 80c | ----- 20.00 |
| 1 man at \$3.00, 26 days | ----- 78.00 |

Total-----\$228.00

The FORDSON saves you in operating expenses for a month \$28.00. The FORDSON saves you one half your time, plowing 208 acres while 6 mules plow only 104 acres.

HAYTI, MO.

Combination Double-Gang Pulverizer, Roller, Packer and Clod Crusher

In one operation it will make all of these steps in the preparation of the soil, and so eliminates the necessity of using a separate roller and pulverizer, thus saving both time and money. The rear gang can be easily removed if a single gang machine is only required. Come in and let us figure with you on any implement used in the field.
